Declaration

I declare that this thesis is my own work and that, except where explicit acknowledgement is made, it contains no material that has been submitted, either in whole or in part, for the award of any other degree or qualification at this or any other university or tertiary institution. To the best of my knowledge and belief, this thesis contains no material previously published or written by another person, nor material that has been produced in collaboration with others, except where such material is clearly acknowledged and its contribution explicitly identified in the text. This thesis has been prepared in accordance with the University's guidelines and regulations as in force at the time of submission for examination.

Chapter 1

Introduction

This is an example chapter. Abbreviations are typeset with artificial intelligence (AI) and machine learning (ML); symbols such as E come from `symbols.tex`. References are cited as usual [1].

Figures, tables and algorithms are collected by `endfloat` and printed in the appendices at the end of the document (see Figure 1, Table 1 and Algorithm 1).

Definition 1.1. This is an example definition environment.

Lorem ipsum dolor sit amet, consectetuer adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetuer id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. For Review (2026-10-25)

This thesis was typeset using LaTeX with a custom `thesis` class based on the `memoir` document class. The document was prepared in 12pt type on A4 paper, using the Latin Modern type family, with typographic refinement provided by `microtype`. Figures, tables, algorithms, glossaries, references, and cross-references were prepared within a reproducible LaTeX workflow. Technical illustrations were produced using `TikZ`; references were managed using `biblatex` with the `biber` backend; and delayed floats were collected using the `endfloat` package.

Prepared at The University of Waikato, Hamilton, New Zealand, 2026.
